

# 1. Introduction

Sports fans live for the thrill of being right. Calling the upset. Predicting the score. Owning the moment.

S-COIN Sports takes that energy and puts it on-chain. A Web3 sports prediction app powered by S-COIN, where every pick counts and every win means more than just pride.

No middlemen. No waiting. Just fast, fair, and transparent competition built on Solana — with real rewards that fuel the future of sports picks.

## 2. Vision & Mission

Vision:

To be the ultimate Web3 destination for sports fans — where every prediction, every upset, and every win is powered by S-COIN. A platform that transforms sports picks into a global game of skill, competition, and reward.

Mission:

- Empower fans with a fair and transparent way to make picks.
- Reward knowledge by turning correct calls into S-COIN tokens.
- Unite communities across college football, pro sports, and beyond.
- Evolve constantly — adding more sports, more features, and more ways to play.

S-COIN Sports is where competition meets blockchain.

## 3. Market Opportunity

Sports aren't just games — they're the world's favorite competition.

- Over 5 billion fans follow sports globally.
- The sports betting and prediction market is projected to hit \$180+ billion by 2030.
- College football alone draws tens of millions of fans every season, with billions in wagers and pick'em contests.

But here's the problem:

- Traditional platforms are centralized, taking cuts and holding control.
- Transparency is weak — fans don't always trust the odds, payouts, or systems.
- Rewards are limited — most picks don't pay, and bragging rights fade quickly.

That's where S-COIN Sports enters.

By combining sports fandom with blockchain's speed, fairness, and tokenized rewards, S-COIN Sports is positioned to capture a massive piece of this global market. Fans already love making picks — now they can finally own the rewards.
